

Interflex ACS for ICICI Bank Security

Summary-

It goes without saying that any banking system is most vulnerable to security threats and if the right security measures are not taken there's a whole lot at stake. ICIC bank needed a security and surveillance that can out guards such as centralized access management system, biometric access and much more that could totally create an awareness, alertness and warnings for any miscreant activities in their offices. Konnet's team set the security standards high with innovative technology and fool-proof solutions.

Challenge-

Taking into consideration the sensitive nature of business of Banking, Konnet took extra efforts in determining and analysing the problem and thus provided various solutions. Here is the list of solutions that made the baking staff worry less and concentrate more on business-

- PAN India
- Biometric access system for currency chest – Centralized
- ERP Integration
- Centralized Access Management system for around 10000+ employees
- Retrofit with Existing HID i-Class Cards and Readers
